FORCON INTERNATIONAL

Dallas 1 Construction - Tampa, FL - Vice President/General Superintendent - Responsible for the operation of nine crews working on average of twelve different projects on a daily basis, including but not limited to labor, materials and supplies, meetings, permits and general troubleshooting.

Projects included storm drain, irrigation, paving, roads, sanitary sewer water, clearing & grubbing and other site development requirements. All sales negotiations for the purchasing of equipment and materials. Worked directly with all city, county and private inspectors in numerous agencies. Had major input in the growth of Dallas 1 by over 200% this six-year period.

Holmberg Farms - Developed five hundred acre nursery, including storm drain, irrigation, clearing and grubbing, roads, and greenhouse construction.

R.J. Davis Construction - Valrico, FL - Vice President - Responsible for the operation of five crews working on average of seven different projects on a daily basis, including but not limited to labor, materials and supplies, meetings, permits and general troubleshooting. Duties included storm drain, irrigation, paving, roads, sanitary sewer water, clearing & grubbing and other site development requirements. All sales negotiations for the purchasing of equipment and materials.

Projects included Big Ben Power Plant, Gannon Station, Tampa Electric Company, Crippled Children's Hospital, Shriners Headquarters and various shopping centers.

The following history highlights specific jobs:

Grant Hunter Project - City of Plant City, Florida. The work included the excavation of approximately 175,000 cubic yards of fill for the construction of a drainage basin. Other requirements of this job were storm drain, fencing, landscaping, including the planting of one hundred twenty live oak trees and sodding, concrete driveways, roadway improvements and asphalt overlay.

Drew Park Drainage - City of Tampa, Florida. This project required the installation of twin 84" concrete storm piping in an existing flowing drainage canal. Each joint of pipe weighed more than twenty-two thousand pounds. Also included was the installation of conflict structures to protect existing sanitary sewer and fiber optics servicing Tampa International Airport, poured in place concrete headwalls, concrete revetment slope protection and landscaping.

66" Potable Water Line -Tampa Bay Water. This challenging project consisted of over seven miles of welded steel 66" water line. To complete this job required tunneling under interstate 75 near S.R. 54 in Pasco County Florida, installation adjacent to the runway of a functioning private airport and laying through a seven acre lake. Several jack and bores were required along with extensive wetland restoration. Other items required were pump house construction, cathodic protection and daily meetings to satisfy residents and large property owners along the construction route.

FORCON INTERNATIONAL

Cities of Tampa, Temple Terrace, New Port Richey, Lakeland and Plant City, Florida. Retrofits of existing gravity sewer, force main, potable and reclaimed water lines. Also, new construction of the same. These projects all required right of way restoration, paving, concrete curb and driveway work and landscaping.

Tampa Electric Company and Florida Power. Maintenance and new construction of powerline right of ways within the system. In addition, site work for the construction of new power generating plants at the Big Bend site in Apollo Beach, Florida and Gannon Station in Tampa, Florida.

Private Subdivisions. Construction of over forty private subdivisions for several developers. These projects included clearing and grubbing, earthwork, storm drain, gravity sewer installation, lift stations, potable and reclaimed water, underground piping for the purpose of electric power, concrete curb, base and paving. Locations include projects in the cities of Tampa, Plant City, Lakeland, Orlando, Temple Terrace and Oviedo, Florida. Unincorporated areas of Hillsborough, Polk, Manatee and Pasco counties.
